

Catalogic™ ECX – Copy Data Management Fast Start Advanced Module

Why devote time to mastering a task you will only do once?

Accelerate Your Implementation and ROI

Highly experienced Catalogic deployment and implementation specialists work with you onsite to configure your enterprise, test it, and provide hands-on training for storage, application, virtualization and backup administrators and operators. At the end of the process, you will have firm command of your enterprise and will employ best practices for managing it.

Fast Start Advanced Module

The Fast Start Advanced Module is designed for new installations utilizing copy data management (CDM) for automated dev-test, DevOps, data protection, disaster recovery and automated snapshots management by SLA.

Activities focusing on CDM include:

- Install, update, & configure Catalogic ECX
- Configure and test SLAs across relevant application, hypervisor and storage resources
- Setup LDAP and role based access control

Catalogic Fast Start engineers will also work with you to efficiently implement your system and train you to operate it. Activities include:

- Review existing environment, design, & copy data management strategy
- Install, update, and configure your copy data management solution based on Catalogic ECX
- Test snapshot creation and restoration processes
- Provide hands-on training

Hands-On Training

Training is an important part of the Fast Start Services. Once everything is running and tested, Fast Start engineers will work with you to ensure that you are able to operate your system through the ECX web UI and API. The training includes an overview of all essential product modules, operational procedures, and process monitoring.

Best Practices

Expert Catalogic Professional Services engineers specializing in implementation help you get started quickly and ensure your implementation reflects Catalogic best practices for functions such as copy data management, snapshot orchestration and automation, plus ongoing operations maintenance.

Additional Options

You can add services to tailor Fast Start for your particular enterprise. There are multiple add-on options:

- Operational acceptance testing
- Data masking
- Custom workflows via API integration
- Detailed reporting setup and environment documentation

Implementing an advanced, full-featured copy data management solution can be challenging, especially if your enterprise is large and complex.

Designed for enabling enhanced and automated copy data management, Fast Start Services will get you started quickly and help give you the foundation to operate, maintain, and expand your copy data management capabilities.

Quantifiable Benefits

With the assistance of Fast Start Services, Catalogic customers have experienced significant savings, such as:

- Implementation worker-days reduced by 50%
- Subsequent support activity reduced by 50%
- Storage requirements reduced by 20%

Start the Partnership for Excellence

Catalogic Data Management Services are comprised of:

- Professional Services
- Support Services
- Training Services
