

HPE AND CATALOGIC SOFTWARE

HPE Nimble Storage and Catalogic ECX

Working together. Accelerating results.

A NEW STYLE OF PARTNERING

Hewlett Packard Enterprise and Catalogic Software are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Catalogic Software is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Catalogic Software has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

PRODUCT OVERVIEWS

Catalogic ECX

Catalogic ECX copy data management for HPE Nimble Storage simplifies and automates storage operations through comprehensive management of snapshots. ECX reduces copy sprawl, simplifies data protection, and delivers value-add use cases such as automated deployment for DevTest or DevOps.

Catalogic's in-place copy data management (CDM) approach provides significant TCO and operational benefits to HPE Nimble Storage customers:

- Automates creation and use of snapshots and zero-copy clones on HPE Nimble Storage arrays
- Integrates HPE Nimble Storage copy processes with key applications such as VMware®, Oracle®, SQL Server, and SAP HANA®

- Simplifies critical IT functions including data protection and disaster recovery
- Modernizes IT with user self-service and API-based operations without additional hardware
- Automates dev/test copy provisioning—spins up copies in minutes by schedule or on demand
- Catalogs and tracks snapshots, virtual machines, datastores, and applications
- Delivers advanced insights into copy data across the enterprise and RPO/RTO compliance reporting

Catalogic ECX uses simple, storage controller-based licensing with no concerns about database size or number of instances.

HPE Nimble Storage

HPE Nimble Storage All Flash Arrays are simple to deploy, use, and manage. They are cloud-ready and deploy flash on-premises or in the cloud with common data services and mobility between all-flash, adaptive flash, and HPE Cloud Volumes. They are scale-to-fit; scale up performance and capacity independently and non-disruptively; and scale out to four arrays managed as one for increased flexibility.

HPE Nimble Storage leverages flash storage and predictive analytics to help eliminate the gap and guarantee 99.9999% availability,¹ delivering an outstanding all-flash capacity per TB in the industry—and future-proofing design for value today and tomorrow.

and OPEX while providing superior support. With its Smart Data Suite of products and client services, Catalogic helps clients protect, recover, manage, secure, and orchestrate their storage backup and snapshot copy data across their enterprise and cloud in support of mission-critical IT functions including disaster recovery, test/dev, DevOps, and business analytics. Catalogic also provides next-generation data protection for cloud-native and container applications with its CloudCasa Kubernetes service.

Catalogic has an international network of partners, system integrators, and resellers that sell and deploy Catalogic solutions. The Catalogic Channel Partner Program provides HPE resellers with sales, technical and marketing resources, and financial incentives to effectively market, sell, and support innovative data management solutions for HPE customers.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is the global edge-to-cloud platform-as-a-service company that helps organizations accelerate outcomes by unlocking value from all of their data, everywhere. Built on decades of reimagining the future and innovating to advance the way people live and work, HPE delivers unique, open, and intelligent technology solutions, with a consistent experience across all clouds and edges, to help customers develop new business models, engage in new ways, and increase operational performance.
